

Houston Museum of Fine Arts Fountain Courtyard

Team: Owner – Houston Museum of Fine Art Fountain Engineers – Waterscape Consultants GC – McCarthy Building Company

Concept

Museum expansion to include new sculpture courtyard with water feature centerpiece. Fountain includes 54 nozzle interactive fountain with show control programming.

Scope

Fountain component installation along with complete filtration package, automation, and commissioning. Plumbing of chemical supply system, wind sensor overrides, and supply and drain piping which spans the courtyard understructure. Piping system penetrated the parking structure to remote equipment and chemical rooms. Fountain has zero water depth so full water volume is contained in filtration piping system.

Summer 2018
